Amy Livingston of , never thought that she would consider it, until curiosity got the best of her and she filled out a simple online form. Before she knew it, she discovered her secret to beating the recession, and being able to provide for her family while at home with her three children.

I read Amy's blog last month and decided to feature her story in our weekly consumer report. In our phone interview she told me her amazing story. "I actually make about \$15,000 to \$17,000 a month working from home. It's enough to comfortably replace my old job income, especially considering I only work about 15-18 hours a week from home right now.

Working online has been a financial windfall for Amy, who struggled for months to find a decent job but kept hitting dead ends. "I lost my job shortly after the recession hit, I needed reliable income, I was not interested in the "get rich quick" scams you see all over the internet. Those are all pyramid schemes. I just needed a legitimate way to earn a living for me and my family. The best part of working online is that I am always home with the kids, I save a lot of money."

I asked her about how she started her remarkable journey. "It was pretty easy, I actually received an email that sparked my interest, so I went to the site, filled out a short form and signed up for a work at home program where I got instant access to everything! Since they offered a 365 Day Money Back Guarantee - I figured I really had nothing to lose. So, I started the program and within four weeks I was making over \$5,000 a month. It's really simple, I am not a computer whiz, but I can use the internet. I followed the instructions, and I don't even have to sell anything and nobody has to buy anything. This is a very stable system and they are recruiting, you should try it."

Consumers purchase Billions and Billions of dollars worth of products each year online. Every time people use the internet, go on facebook or do a search, someone is making money. This program will teach you how to get a piece of this money and free yourself from the 9-5. The internet economy has grown by leaps and bounds in the recession, so why not take advantage of the gold rush? There are plenty of scams on the internet claiming you can make \$50,000 a month, but that is exactly what they are... scams. From my conversation with Amy, "I am making a good salary from home, which is amazing, under a year ago I was jobless in a horrible economy. I thank God every day that I signed up for this program."
